NORWAY

Dear Hiring manager,

My name is Camilla and I am inquiring about your open position as a front-end developer. I read about the position in [Finn.no](https://finn.no) and according to the criteria for the position and I am confident I would be a strong fit. I am passionate about updating and improving old designs and I could be a good addition to your team.

From my studies at Noroff Fagskole I have gained deep knowledge of how front-end development is done in a sustainable way. I also have some experience in React that I have gained through my personal projects. Because of my former work as a Kindergarten teacher I have good people skills and I am good at teaching others.

I am interested in making the websites I make as accessibility friendly and user oriented as possible, and as it states in the application you are looking for someone with good knowledge about the user experience. I am eager to improve my abilities as a front-end developer and because of my fast learning skills I will be able to learn the skills necessary to complete this work.

I look forward to hearing from you. Feel free to reach out if you have any questions.

Kind regards,

Camilla Furuknappen Larsen
